Exciting screening performance

# HAYER EXCITERS

## HAYER Equipment, ensuring excellence and quality.

HAYER exciters combine years of experience in engineering high performance vibrating screens manufactured to properly set the required stroke, frequency and exact static moment for each application, resulting in improved screening performance. Our experienced team doesn't just offer innovative technology, we have the service and maintenance solutions to match.

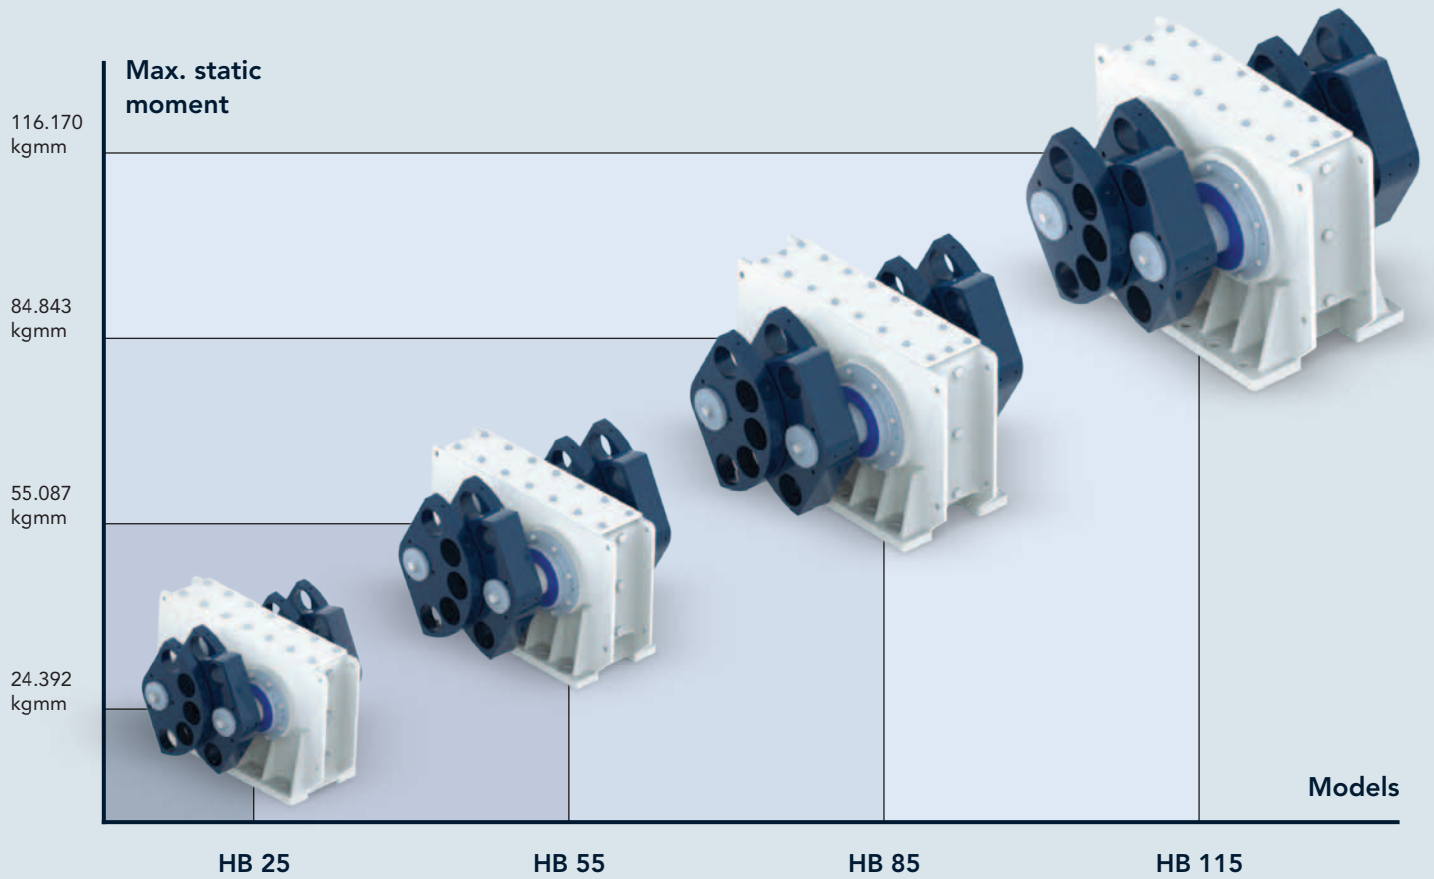

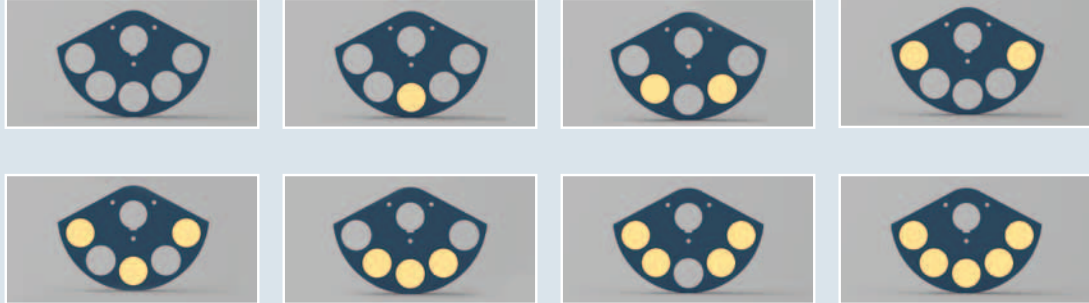

- Four models combined with eight weight configurations equals the largest static moment range on the market.
- Adjustable static moment allows for fine tuning to ensure the vibrating screen has the correct pull.
- Robust engineering to ensure operational safety.
- Global technical assistance and inventory through the worldwide Haver & Boecker Service network.

XL CLASS TE 4000 X 11000

# MODELS

Possible mounting configurations of the weight (steel or lead) for adjusting the static moment.
